## ENVIRONMENTAL SUSTAINABILITY IN HEALTHCARE - THE NEED OF THE HOUR

With the healthcare sector causing a massive environmental footprint of 4.4-5% of global emissions, environmental sustainability has become a top priority for healthcare organisations. Many institutions are aligning their strategies with the United Nations Sustainable Development Goals (SDGs) to build a sustainable future. Understanding how an organisation overcomes the barriers and integrate sustainability into its strategy & business operating model will create a competitive advantage in the years ahead.

As the road to sustainability is filled with challenges & complexities, it is an imperative for organisations to have the support of a REPUTED, EMPOWERING & GUIDING PLATFORM that enables a smooth transition toward sustainable systems.

### ABOUT H.E.L.P. HEALTH AND ENVIRONMENT LEADERSHIP PLATFORM (H.E.L.P.)

H.E.L.P. is a knowledge-sharing and networking platform established by the Public Health Foundation of India (PHFI) under the Centre for Environmental Health (CEH), in collaboration with Health Care Without Harm (HCWH).
